

NEVADA STATE UNIVERSITY SCHOOL OF NURSING

Timothy (Tim) Duffey - Simulation Operations Specialist, BS

Tim is part of the simulation operations team, working to ensure the operations exacting standards of excellence are maintained at the NSU Simulation Center for both skills and simulations.

He received his Bachelor of Science degree in Aerospace Studies in 2004 from Embry-Riddle Aeronautical University in Prescott, Arizona. In that time, he also received a pilot's license and spent significant time in multiple modalities of flight simulators including both high and low fidelity. After college Tim worked in the United States Air Force for 6 years where he was responsible for setting up training scenarios to test the ability of individuals to perform their jobs in accordance with US laws. Upon transition from that role, Tim joined the UNLV School of Life Sciences for 10 years as a biology instructor, research assistant, and lab coordinator. During that time, he taught thousands of students and eventually was responsible for hiring, training, and mentoring the laboratory instructional staff.

Currently, as a simulation operations specialist, he is learning how to apply his prior experiences to make the most realistic and meaningful educational learning experiences for nursing students at Nevada State University.
