

NEVADA STATE UNIVERSITY SCHOOL OF NURSING

Crystal Basa (Marcelo) - Simulation Operations Specialist, AGS

Crystal is part of the simulation operations team that works to ensure the operations and exacting standards of excellence are kept at the NSU Simulation Center for the skills lab and executing nursing simulations according to the INACSL standards of best practices.

Her experience in simulation education began at the Clinical Simulation Center of Las Vegas as a student worker. She was trained in the set-up of medical skills labs for nursing and medical programs, as well as high-fidelity simulations for both UNLV and NSU.

Crystal assists with inventory management, skills lab operations, manikin and equipment maintenance, and creation of simulation experience algorithms. She takes great pride in her work with moulage and prop development for simulations, as well as the creation of realistic training medications, and execution of an updated medication administration process in the skills lab and simulation settings.

Crystal is a member of the Society for Simulation in Healthcare and continues to look for new opportunities for learning to enhance student learning experiences by attending simulation conferences across the nation.
