

NEVADA STATE UNIVERSITY SCHOOL OF NURSING

Drake Allen - Simulation Operations Specialist

Drake is part of the simulation operations team at the NSU Simulation Center, where he helps uphold high standards of excellence in both the skills lab and the execution of nursing simulations. His work aligns with INACSL's best practice standards, ensuring quality, consistency, and realism in simulation-based education.

He supports inventory management, skills lab operations, and the maintenance of manikins and simulation equipment. Drake is proficient with a range of technologies, including Laerdal simulators and software, patient monitors, A/V systems, KbPort and MedCart simulation software, as well as Microsoft Office, Adobe Creative Suite, and other computing tools used in the simulation environment.

Still in the early stages of his role, Drake is quickly adapting to the responsibilities of the simulation operations team and remains committed to continuous learning. Though new to the field, he ensures every task is completed as efficiently and effectively as possible to support a high-quality learning environment. His goal is to help provide students with a rewarding and informative educational experience so that, when they enter the field, they are confident, prepared, and equipped with the hands-on practice they need to succeed.
